Black bulletin

how to conquer America ON THE SPOT

Athens, January 2007

When my son was at the kindergarden came to me and announced:

"I' ll take my gun" (he was meaning his plastic toy) "and I' ll go to America. I' ll kill everybody there and I' ll become the Emperor of America. The only think that I need from you is to buy me a tiket"

I replied "I' m very proud of you my son and I' m sure that you will be the best emperor that America ever had". And of course I didn't bought any ticket.

Now, at the international business, hundreds of persons are coming to us monthly, requiring to buy for them the water gun or the ticket.

What to say to them? They have no chance. Refineries and Power Plants are for adults and not for kids.

Long time ago we believe to the deep know-how, responsability, innovations and hard work. We are not waiting any more the Santa Clauss who will come from far away carying thousands tons of orders for us.

Did you?
